

COVID-19 Health and Safety Plan – Young Performers Collaborative

Drop off/Pick up of children

1. Staff member will be at the door to the outside. Parents will be expected to remain 6 feet away from staff and other parents/children.
2. Child's temperature will be taken before entering using an infrared (contactless) thermometer. A temperature of 100.0 or higher will lead to child not attending camp for at least that day. (CDC guidelines are 100.5). Child can return if and when he/she is fever free for 24 hours.
3. Parents cannot enter the building at anytime during the camp day

Staff Precautions and Safety

1. All staff will wear masks during the camp day.
2. Staff also has shields and gloves to use as needed for any necessary close contact with a child.
3. Staff will adhere to scheduled hand washings throughout the day. Hand washings will be upon entering the building, before and after eating and before leaving. Hand sanitizer will be plentiful for in between hand washings.
4. Staff will perform scheduled disinfecting of common areas, bathrooms and microphones. These cleanings will take place mid-morning, lunchtime, mid-afternoon and a deep clean when all leave for the day.
5. CDC approved cleaners will be used and stored properly away from the children.
6. Staff will exercise social distancing as much as possible and practical.

Participants Precautions and Safety

1. Participants will wear masks as throughout the day according to CDC guidelines. Please provide a mask and baggie for when he/she is not wearing it while eating and in accordance with CDC standards.
2. Participants will adhere to scheduled hand washings throughout the day. Hand washings will be upon entering the building, before and after eating and before leaving.
3. Hand sanitizer will be readily available and applied to all participants between scheduled hand washings mid-morning and mid-afternoon.
4. Social distancing among participants will be practiced whenever possible and practical. It will be enforced during social and eating times.

5. The number of participants is limited to 20-26.
6. There will be absolutely no food or drink sharing. Water bottles need to be clearly marked with child's name.
7. Staging, Choreography, props and costuming will be adjusted for safer distance and hygiene.
8. Staff will give frequent, public reminders throughout the day stressing all safety measures.

Communication

1. Designated Covid 19 point of contact is Michele Dowling. Michele is responsible for communicating any Covid information and responding to any concerns. Her email is ypcworkshop@gmail.com. Her cell number will be given to participants at sign up.
2. Parents will be notified immediately of any staff or participant exposure to Covid 19. Staff and participants are expected to be completely transparent about any such exposure.
3. Staff and participants are expected to be transparent about ANY Covid symptoms so good decisions can be made for the safety of the group. **COVID Symptoms are as follows:** Cough, shortness of breath or difficulty breathing, fever, chills, muscle pain, sore throat, new loss of taste or smell. Less common symptoms are gastrointestinal symptoms like nausea, vomiting or diarrhea.

Plan for Staff or Participant who shows any illness during camp day

1. Participant or staff who has ANY symptoms of Covid during the camp day would be quickly moved to a separate area or room with one staff member.
2. Both staff member and ill person would be masked and wearing a shield and gloves.
3. All other staff and participants would be moved to the downstairs.
4. Ill child/staff's parents would be called first for pick up. All other parents would also be called to send all home to deep clean the area.
5. All could return the following day. A doctor would need to be consulted for return of ill person and likely proof of a negative Covid test.
6. All of the above would be a case by case basis to some degree. If someone has a fever and more than one Covid symptom then utmost of precautions will be enforced. If they have a low grade fever and no other symptoms and some other contributing factor (allergies, lack of sleep) and are completely fine the next morning, then a Dr. would be

consulted about return to camp. We will exercise great caution but also be reasonable 😊
